## EDUCATION

### University of Colorado, Denver

MS in Business Analytics

Denver, CO

Graduation Date: May 2026

- Graduate Assistant (International Enrollment Ops): Streamlined **transcript evaluation and documentation workflows**, collaborating across admissions and operations teams to improve process efficiency and student experience.
- Relevant Coursework: Statistics for Business Analytics, Predictive Analysis, Prescriptive Analysis, Evaluative analysis and Causal Analysis, Supply chain Analytics

### University of Mumbai, Lokmanya Tilak College of Engineering.

BE in Mechanical Engineering

Mumbai, India

Graduation Date: June 2018

- Organizations/Awards: Contributed as a Volunteer and advanced to Treasurer of the Mechanical Engineering Student Association (MESA), managing finances and budgets for 200+ members while coordinating events and supporting student initiatives.
- Relevant Coursework: Database and Information Retrieval System, Production Planning and Control, Supply Chain Management.

## SKILLS

**Tools:** SQL, Excel, Python, R, Power BI, Tableau, Data Analysis, Power Query, Microsoft Office, Problem Solving, Communication, Teamwork, Critical Thinking.

## RELEVANT EXPERIENCE

### Data Analyst – Sustainability & Energy Management

University of Colorado Denver

Denver, CO

Oct 2025 – Present

- Analyzed **utility and building performance datasets** to identify energy inefficiencies, abnormal usage patterns, and operational anomalies.
- Supported **Strategic Energy Management (SEM)** and **fault detection & diagnostics (FDD)** initiatives using **SkySpark** and **ENERGY STAR Portfolio Manager**.
- Developed **interactive Power BI/Tableau dashboards** to track sustainability KPIs, including **energy use, carbon emissions, water, and waste**.

### Data Analyst – Healthcare Analytics

University of Colorado Denver

Denver, CO

Jan 2025 – May 2025

- Uncovered evolving symptom patterns across **200+ patients over 28 days** by applying K-Means clustering and PCA on time series healthcare data, enhancing understanding of drug vs non-drug behaviors.
- Improved accuracy of symptom analysis by cleaning, translating, and grouping multilingual reaction logs using Python (pandas, NumPy) and R, leading to more actionable insights.
- Enabled better decision-making for research stakeholders by designing violin plots, kernel density plots, and cluster visualizations that highlighted diversity and concentration of patient symptoms.

### Production Planning & Control Engineer

Machin Fabrik Industries Pvt Ltd

Navi Mumbai

June 2018 - Nov 2018

- Analyzed historical inventory and stock movement data to optimize stock levels, reducing stock-outs and improving coordination between procurement, manufacturing, and logistics teams.
- Minimized downtime by implementing **data-driven dashboards** to monitor production metrics and proactively resolve scheduling conflicts and material delays.
- **Identified inefficiencies and bottlenecks** in production workflows by applying **Lean Six Sigma principles** and conducting process audits, contributing to smoother operations and better-quality control.

## ACADEMIC PROJECTS

### Portfolio Optimization using Excel Solver and Python

Python, Excel Solver, SciPy, Pandas, NumPy, Matplotlib

- **Developed four portfolio optimization models** in Excel and Python to compare return–risk tradeoffs using **GRG Nonlinear** and **SLSQP** algorithms.
- **Engineered real-world investment constraints** (no short-selling,  $\leq 30\%$  per asset) and implemented **L2 regularization** to promote diversification and reduce overfitting.
- **Increased Sharpe ratio by 41%** (from 0.763 to 1.075) through algorithmic refinement and risk-penalized optimization.
- Created **interactive dashboards and visualizations** (efficient frontier, asset weights, and Sharpe comparisons) using Excel and Python to communicate model performance.

### Retail Sales Analysis SQL Project

SQL (CTEs, Window Functions, Aggregation), Business Analytics, Customer Segmentation, Time-Series Analysis, Microsoft SQL Server

# Pratik More

Denver, CO (open to relocation) | 303-505-8686

[|pratikmore0105@gmail.com](mailto:pratikmore0105@gmail.com) | [| linkedin.com/in/pratikm0105/](https://www.linkedin.com/in/pratikm0105/) | [| github.com/pratikmore](https://github.com/pratikmore) | [| portfolio](#)

- **Identified sales peaks and high-performing months** by calculating monthly averages and ranking sales using **SQL window functions**, helping simulate real-world retail seasonality analysis.
- **Derived customer and category-level insights** such as **top 5 spenders**, unique buyers per category, and high-ticket transactions by writing multi-step SQL queries with aggregations and joins.

## OTHER EXPERIENCE

---

### Software Engineer in Test

Akirhs Software Solutions | Client: Royal Caribbean Group

**Mumba, India**

Jan 2020 – Jan 2023

- Improved overall **software reliability and release stability** by executing comprehensive **manual, functional, and regression testing** within an **Agile/Scrum environment**, supporting multiple on-time production releases.
- Reduced **defect resolution turnaround time by ~30%** by designing and maintaining structured **test cases**, tracking defects, and documenting progress using **JIRA**, enabling seamless collaboration with developers and product owners.
- Increased **release quality and customer experience** by performing **API testing and validation** using **Postman**, identifying critical integration issues prior to production deployment.
- Ensured **production-readiness of Gold Builds** by conducting end-to-end validation, smoke testing, and release signoffs, preventing high-severity defects from reaching live cruise operations.
- Strengthened **cross-functional collaboration** by working closely with developers, QA leads, and business stakeholders to clarify requirements, reproduce defects, and verify fixes across web and mobile applications.
- Supported **accessibility and usability compliance** by testing web and mobile applications against defined standards, contributing to a more inclusive digital experience for end users.
