EDUCATION

University of Colorado, Denver

MS in Business Analytics

Denver, CO

Graduation Date: May 2026

- Graduate Assistant (International Enrollment Ops): Streamlined **transcript evaluation and documentation workflows**, collaborating across admissions and operations teams to improve process efficiency and student experience.
- Relevant Coursework: Statistics for Business Analytics, Predictive Analysis, Prescriptive Analysis, Evaluative analysis and Causal Analysis.

University of Mumbai, Lokmanya Tilak College of Engineering.

BE in Mechanical Engineering

Mumbai, India

Graduation Date: June 2018

- Organizations/Awards: Contributed as a Volunteer and advanced to Treasurer of the Mechanical Engineering Student Association (MESA), managing finances and budgets for 200+ members while coordinating events and supporting student initiatives.
- Relevant Coursework: Database and Information Retrieval System, Production Planning and Control, Supply Chain Management.

RELEVANT EXPERIENCE

Research Assistant – Healthcare Analytics Project

University of Colorado Denver

Denver, CO

JAN 2025 – May 2025

- Uncovered evolving symptom patterns across **200+ patients over 28 days** by applying K-Means clustering and PCA on time series healthcare data, enhancing understanding of drug vs non-drug behaviors.
- Improved accuracy of symptom analysis by cleaning, translating, and grouping multilingual reaction logs using Python (pandas, NumPy) and R, leading to more actionable insights.
- Enabled better decision-making for research stakeholders by designing violin plots, kernel density plots, and cluster visualizations that highlighted diversity and concentration of patient symptoms.

Machin fabrik Industries Pvt. Ltd.

Production Planning & Control Engineer

Navi Mumbai

June 2018 - November 2018

- Analyzed historical inventory and stock movement data to optimize stock levels, reducing stock-outs and improving coordination between procurement, manufacturing, and logistics teams.
- Minimized downtime by implementing **data-driven dashboards** to monitor production metrics and proactively resolve scheduling conflicts and material delays.
- **Identified inefficiencies and bottlenecks** in production workflows by applying **Lean Six Sigma principles** and conducting process audits, contributing to smoother operations and better-quality control.

ACADEMIC PROJECTS

Denver Airbnb Superhost Prediction & Insights

November 2024

Skills: Data cleaning, exploratory data analysis (EDA), clustering, predictive modeling (Logistic Regression, Random Forest), chatbot prototyping with OpenAI

- Analyzed **10,000+** Airbnb listings in Denver to identify high-performing Superhost characteristics, uncovering response rate, cancellation rate, and reviews as top success drivers.
- Built predictive models (Random Forest, Logistic Regression) to classify Superhosts, achieving **82% precision, 85% recall, and 80% overall accuracy**.
- Developed an interactive Superhost Chatbot prototype using OpenAI to deliver personalized recommendations and actionable insights for Airbnb hosts, enhancing pricing strategies, response times, and reliability to boost occupancy and revenue.

Retail Sales Analysis

November 2025

Skills: SQL (CTEs, Window Functions, Aggregation), Business Analytics, Customer Segmentation, Time-Series Analysis, Microsoft SQL Server

- **Identified sales peaks and high-performing months** by calculating monthly averages and ranking sales using **SQL window functions**, helping simulate real-world retail seasonality analysis.
- **Derived customer and category-level insights** such as **top 5 spenders**, unique buyers per category, and high-ticket transactions by writing multi-step SQL queries with aggregations and joins.

SKILLS

Tools: SQL, Excel, Python, R, Power BI, Tableau, Data Analysis, Microsoft Office, Problem Solving, Communication, Teamwork, Critical Thinking.
